

# IF YOU...

MIX IT. FILL IT. PACK IT. SHIP IT.

# WE HAVE A PRODUCT FOR YOU

- The Kijeka's manual-operated tilting forklift and hoist drum rotator is suitable for use with both 210-liter steel and HDPE drums.
- This drum rotator can be used with both a forklift truck and overhead crane.
- Twin webbing and ratchet straps ensure the drum will be safely secure during the rotation process.
- Drum rotation is carried out either by a manual crank handle (for shoulder-height rotation) or a loop chain (for above-shoulder-height rotation), both of which are connected to a high-quality gearbox.
- Due to the gearing ratio, drum rotation can be carried out with ease and minimal effort.
- When it comes to the safe pouring or decanting of drums, this forklift drum rotator will be perfectly suited to the task at hand.
- **Load capacity:** 400 kg

## Fork Lift Mounted Drum Rotator

PARTICULAR	UNIT	KEDTP
Rated Load Capacity	kg	400
Suitable for oil drums	mm	55 Gallon Steel / HDPE

**Note:** There may be any specification/dimensional change. If these specifications are critical, the proposed application should be discussed.
